DETAILED ACTION

This action is in response to an amendment filed on June 11, 2008 for the application of Wei, for a "Method and apparatus for providing updated processor polling information" filed December 15, 2003.

Claims 1-20 are pending in the application.

Claims 1-20 are allowed.

Reasons for allowance

The following is an examiner's statement of reasons for allowance:

Applicant's arguments see pages 7-13 filed June 11, 2008, with respect to claims 1-20 have been fully considered and are persuasive. The previous 102(e) rejection of claims 1-20 has been withdrawn.

In response to applicant's arguments regarding claims 1-20, after a complete search of all the relevant prior art the examiner has determined the claims are in condition for allowance. The following limitations when viewed in combination with the remainder of the claim as a whole place this application in condition for allowance.

As per claim 1, the examiner finds the novel and non obvious feature of claim 1, when read as whole to be collecting processor polling information at boot time to be provided to an operating system, said processor polling information describing operating conditions of an integrated processing system and providing updated processor polling information during runtime to said operating system, said updated processor polling

Art Unit: 2113

information reflecting operating conditions of said integrated processor system after the occurrence of the triggering event.

Bossen describes a method for run-time deconfiguration of a processor in which an error location table is generated subsequent to one or more error occurrences (Fig. 4, element 404 and Col. 5, lines 37-41). Bossen discloses collecting run-time information relative to a specific CPU, however Bossen but does not teach collecting boot time processor polling information. Therefore, claim 1 is allowable over Bossen.

As per claim 9, the examiner finds the novel and non obvious feature of claim 9, when read as whole to be creating a processor polling information table, said processor polling information table being populated with boot time processor polling information and updating said processor polling information table upon receipt of a notification that a triggering event has occurred, wherein said triggering event may potentially alter said operating conditions of said integrated processor system.

Bossen describes a method for run-time deconfiguration of a processor in which an error location table is generated subsequent to one or more error occurrences (Fig. 4, element 404 and Col. 5, lines 37-41). Bossen discloses an error table containing run-time information relative to a specific CPU, however Bossen but does not teach collecting boot time processor polling information. Therefore, claim 9 is allowable over Bossen.

As per claim 16, the examiner finds the novel and non obvious feature of claim 16, when read as whole to be a corrected platform error polling (CPEP) table creator for creating a CPEP table coupled to an operating system, said CPEP table being

Art Unit: 2113

populated with boot time processor polling information and a CPEP table updator coupled to said operating system and further coupled to said triggering event detector, wherein, upon a receipt of a notification of an occurrence of a triggering event from said triggering event detector, said CPEP table updator provides updated processor polling information to said operating system based on said altered operating conditions.

Bossen describes a method for run-time deconfiguration of a processor in which an error location table is generated subsequent to one or more error occurrences (Fig. 4, element 404 and Col. 5, lines 37-41). Bossen discloses an error table containing run-time information relative to a specific CPU, however Bossen but does not teach collecting boot time processor polling information. Therefore, claim 16 is allowable over Bossen.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
